KODILIOSE F. EMELUE

Tech Educator

(901) 290 - 6066 | kfemelue@gmail.com

WORK EXPERIENCE:

CodeCrew

Junior Instructor, Code School | December 2024 - Present

- Taught computer science and application development to 20 students across 4 cohorts, delivering a curriculum focused on building full-stack AI applications using modern technologies, with emphasis on scalable, high-reliability system design.
- Delivered curriculum on Machine Learning fundamentals, AI concepts, and Retrieval-Augmented Generation.
- Mentored students in designing, building, and deploying full-stack applications with emphasis on system integration and production readiness.
- Authored and delivered a seminar, "Introduction to Prompt Engineering," to 60 attendees, demonstrating clarity in technical instruction.
- Supervised Technical Assistants in grading assignments, creating coding exercises, and coaching students, demonstrating strong project management and coordination skills.

Technical Assistant, Code School | August 2024 - December 2024

- Created instructional materials for backend development, API design, and database-driven applications.
- Supported student project teams in system integration and production readiness.

Project Coordinator PH-IDEAS | May 2024 - August 2024

- Coordinated with partners and guest lecturers for specialized training sessions.
- Provided guidance on student projects in Django, Python, JavaScript, data analysis, HTML, and CSS.
- Managed administrative tasks, including attendance tracking and assignment reviews.

Capital One

Software Engineer | Februrary 2020 - December 2023

- Built secure, high-availability cloud systems and automated compliance workflows supporting finance data analyst teams.
- Developed ETL pipelines, dashboards, and CI/CD improvements for internal applications and reporting systems.
- Collaborated across teams to design systems for compliance monitoring and cybersecurity vulnerability tracking.

EDUCATION:

Bachelor of Arts in Economics | Washington University in St. Louis

COMMUNITY INVOLVEMENT:

- LaunchCode Virtual Mock Interview Volunteer
- GiveCamp Memphis 2024 & 2026 Participant
- Iota Community Schools Hackathon Judge 2026

SKILLS:

- **Programming Languages:** Python, JavaScript, SQL, HTML, CSS
- **Methodologies:** Agile, Scrum, MVC architecture, RESTful API design
- **Databases:** MongoDB, PostgreSQL
- **Data Tools & Techniques:** ETL pipelines, Data Visualization, Machine Learning fundamentals, Retrieval-Augmented Generation
