KODILIOSE F. EMELUE

Software Engineer

(901) 290 - 6066 | kfemelue@gmail.com | https://kfemelue.github.io/about-me/

CAREER SUMMARY:

Software Engineer with experience in AWS Cloud infrastructure and success delivering innovative software solutions. Drives projects from conception to deployment, ensuring scalability, performance, and compliance. Known for a solutions-focused approach, adept at data analysis and visualization, and delivering not just code, but value to the business and its customers.

WORK EXPERIENCE:

CodeCrew

Junior Instructor, Code School | December 2024 - Present

- Delivered instruction and mentorship on AI/ML topics to 16 students emphasizing building and deploying MERN stack applications that leverage Retrieval-Augmented Generation.
- Authored curriculum for "Introduction to Machine Learning" course covering regression analysis and fundamental ML techniques.
- Mentored students in developing full-stack projects using the MERN stack (MongoDB, Express.js, React, Node.js).
- Delivered introductory HTML, CSS, and JavaScript workshops to middle school students at career interest events, demonstrating the ability to teach technical content effectively to non-technical audiences.
- Authored and delivered a seminar, "Introduction to Prompt Engineering," to 60 attendees, demonstrating clarity in technical instruction and system thinking
- Supervised Technical Assistants in grading assignments, creating coding exercises, and coaching students, demonstrating strong project management and coordination skills.

Technical Assistant, Code School | August 2024 - December 2024

- Authored JavaScript-based assignments and instructional materials.
- Provided comprehensive feedback on student projects, tracked attendance, and supported students.

Project Coordinator PH-IDEAS | May 2024 - August 2024

- Coordinated with partners and guest lecturers for specialized training sessions.
- Provided guidance on student projects in Django, Python, JavaScript, data analysis, HTML, and CSS.
- Managed administrative tasks, including attendance tracking and assignment reviews.

Capital One

Software Engineer | Februrary 2020 - December 2023

- Managed Infrastructure as Code (IaC) to maintain and secure high-availability applications for finance data analyst teams.
- Developed an automated AWS-based dashboard for cybersecurity compliance, significantly reducing manual oversight.
- Orchestrated weekly review of noncompliance and cybersecurity vulnerabilities across three teams ensure timely remediation of findings in deployed applications.
- Maintained and improved CI/CD pipelines; contributed to full-stack feature development for cloud-based web applications.
- Practiced Agile methodologies to ensure timely delivery of software projects.

RELEVANT PROJECTS:

HackMemphis Fall 2024 Civics Hackathon Participant

- Developed a FastAPI backend for "Blight Bounties" a civic-tech web application enabling Memphis citizens to address urban blight efficiently.

EDUCATION:

2015 - 2019 | Washington University in St. Louis

Bachelor of Arts in Economics

CERTIFICATIONS:

AWS Certified Solutions Architect – Associate

SKILLS:

- **Programming Languages:** Python, JavaScript, SQL, HTML, CSS
- **Frameworks & Libraries:** React, FastAPI, Node.js, Express, MERN stack
- **Cloud & DevOps:** AWS (QuickSight, EC2, S3, Lambda, CloudFormation), Infrastructure as Code (IaC), CI/CD pipelines
- **Methodologies:** Agile, Scrum, MVC architecture, RESTful API design
- **Data Tools & Techniques:** ETL pipelines, Data Visualization, Machine Learning fundamentals, Retrieval-Augmented Generation

COMMUNITY INVOLVEMENT:

- LaunchCode Virtual Mock Interview Volunteer
- GiveCamp Memphis 2024 Participant
- Active participant and contributor in civic tech hackathons, community education initiatives, and volunteer mentoring programs.
